

# Timber Product Output and Use Virginia, 2019

Virginia forests accounted for a total of 554,095 thousand cubic feet (MCF) of timber products while the forest products industry produced a total of 570,288 MCF within the State.

This resource update contains the findings of a canvass of all primary wood-using plants in Virginia. It complements the Forest Inventory and Analysis (FIA) annual inventory of volume and removals. The canvass was conducted to determine the amount and source of wood receipts and annual timber product imports/exports. Only primary wood-using mills were canvassed. Primary mills are those that process roundwood in log or bolt form or as chipped roundwood. Examples of industrial roundwood products are saw logs, pulpwood, veneer logs, poles, and logs used for composite board products. Mills producing products from residues generated at primary and secondary processors were not canvassed. Data used in this update were accessed from the FIA Timber Product Output database (see back page).

- Biomass/energy plant
- Composite Panel/Eng. Wood Product mill
- ✕ Misc - Concentration/export yard
- △ Pole mill
- ▽ Post mill
- △ Pulp/Paper mill
- ▽ Saw mill (includes coop/stave, handle)
- Veneer/plywood mill
- Hardwood
- Hardwood/Softwood
- Softwood

**Virginia had a total production of 554,095 MCF in 2019.**

**There are about 175 primary wood processing mills accounting for production in the State.**

Statewide roundwood production (% of total) by product

Saw logs	40.40%	■
Pulpwood	33.10%	■
Bioenergy/Fuelwood	14.01%	■
Miscellaneous	12.09%	■
Posts	0.37%	■
Poles	0.04%	■

Virginia imported 67,609 MCF into the State and exported 51,415 MCF out of the State making them a net importer of roundwood.

Total roundwood production over time

■ Hardwood ■ Softwood
