

# Timber Product Output and Use Virginia, 2020

Virginia forests accounted for a total of 607,543 thousand cubic feet (MCF) of timber products while the forest products industry produced a total of 622,879 MCF within the State.

This resource update contains the findings of a survey conducted on a sample of all primary wood-using mills in Virginia. It complements the Forest Inventory and Analysis (FIA) annual inventory of volume and removals. The survey was conducted to determine the amount and source of wood receipts and annual timber product imports/exports. Only primary wood-using mills were surveyed. Primary mills are those that process roundwood in log or bolt form or as chipped roundwood. Examples of industrial roundwood products are saw logs, pulpwood, veneer logs, poles, and logs used for composite board products. Mills producing products from residues generated at primary and secondary processors were not surveyed. Data used in this update were accessed from the FIA Timber Product Output database (see back page).

**Virginia had a total production of 607,543 MCF in 2020.**

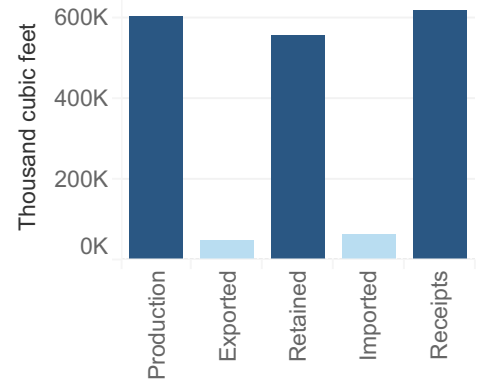

**There are about 166 primary wood processing mills accounting for production in the State.**

Statewide roundwood production (% of total) by product

Saw logs	43.95%	■
Pulpwood	28.73%	■
Bioenergy/Fuelwood	16.91%	■
Miscellaneous	9.74%	■
Poles/Posts/Pilings	0.67%	■

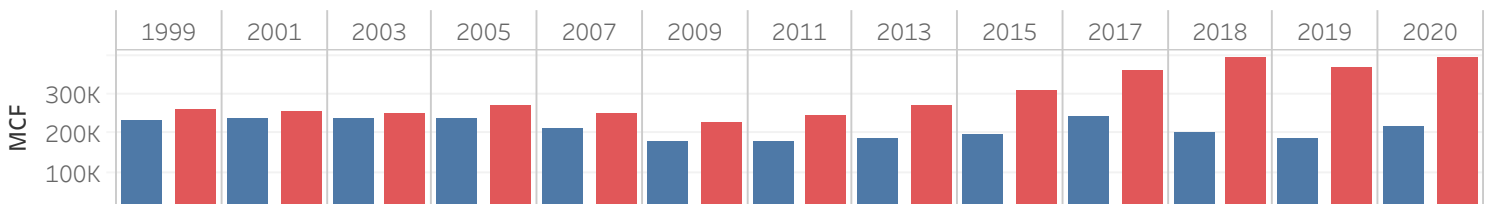

\*Misc. includes all roundwood uses not listed

Virginia imported 62,826 MCF into the State and exported 47,490 MCF out of the State making them a net importer of roundwood.

Total roundwood production over time

■ Max. Hardwood .. ■ Max. Softwood P..
