## Landowner Legacy Planning Workshops

*In-person and virtual workshops begin August 26*

The Virginia Department of Forestry (VDOF) and the Virginia Cooperative Extension (VCE) encourage landowners to make plans – now – for passing on their land to the next generation. The Generation NEXT program, a collaboration between VDOF and VCE, helps Virginia landowners make plans to keep forests intact, in forest, and in family.

To help landowners get started and clarify misconceptions about the legacy planning process, the Generation NEXT Program is hosting in-person and virtual workshops this summer and fall. The workshops, which will take place in South Boston, Galax and New Kent, serve as opportunities for family members to ask difficult questions, receive useful information, and get on the same page about their plans for the future.

Typically, these sessions are only in-person, but a virtual workshop has been added so dispersed families can also take advantage of these helpful resources and tools that make the planning process more accessible and manageable.

### Workshop Information

Families pay a single fee to participate. Registration opens up six weeks prior to each workshop. [Visit the VCE website for more information.](#)

**In-person:**

- South Boston – Aug. 26-27
- Galax – Oct. 27
- New Kent County – Nov. 2

**Virtual:**

(All virtual workshops take place from 3 to 5 p.m.)

- Sept. 7
- Sept. 8
- Sept. 14
- Sept. 15

“Many landowners are overwhelmed by the legacy planning process and assume that it primarily involves complicated estate planning with attorneys and accountants,” said VDOF Forestland Conservation Program Manager Karl Didier. “The Generation NEXT program helps to ease estate planning and demonstrates how it’s just one part of the ongoing legacy planning process. Much like a forest changes over time, your plans will evolve. As priorities change or family dynamics shift, so should plans for your land.”

“One of the most important steps in legacy planning includes conversations between the landowner and the people who will steward their land after they’re gone,” said Generation NEXT Program Coordinator Karen Snape. “When unforeseen events occur before clearly established plans for your estate and land can be put in place, things can quickly become complicated for surviving family members. Having these conversations now is critical.”

A companion to the workshop series, the award-winning Legacy Planning: A Guide for Virginia Landowners publication, provides an overview of the nine major steps involved in developing a robust land legacy plan. It includes case studies from landowners throughout Virginia and guides landowners to tools and resources. The free publication is available on the Virginia Tech website or in print by request.

###

### ***About the Virginia Department of Forestry***

*The Virginia Department of Forestry (VDOF) protects and develops healthy, sustainable forest resources for Virginians. With nearly 16 million acres of forestland and more than 108,000 Virginians employed in forestry, forest products and related industries, Virginia forests provide an overall economic output of more than \$21 billion annually.*

*Headquartered in Charlottesville, the agency has forestry staff members assigned to every county to provide citizen service and public safety protection across the Commonwealth, which it’s been doing now for more than 100 years. VDOF is an equal opportunity provider.*

### ***About the Virginia Cooperative Extension***

*Virginia Cooperative Extension brings the resources of Virginia's land-grant universities, Virginia Tech and Virginia State University, to the people of the commonwealth. We are a dynamic organization that stimulates positive personal and societal change, leading to more productive lives, families, farms, and forests as well as a better environment.*

*Understanding that knowledge is power, we place that power in the hands of Virginians and help them learn how to use it to improve the quality of their lives. Our Extension agents and specialists form a network of educators whose classrooms are the communities, homes, and businesses of Virginia, where they bring research-based solutions to the problems facing Virginians today. Extension programs are delivered through a network of faculty at two universities, 108 county and city offices, 11 agricultural research and Extension centers, and six 4-H educational centers.*
